Subject: Preserve and Protect: FREE Webinar by LAN Infotech and McAfee

Do you ever worry about being asked to produce a specific series of emails to satisfy a legal, human resources, or compliance issue? Does the thought of an email inadvertently revealing proprietary information keep you up at night?

Email archiving and email encryption Webinar on March 10
If you face these challenges, this FREE Webinar is a vital step to learning how you can preserve and protect – both your email and your employees. At LAN Infotech we understand the threat landscape and have the solutions you need to feel more confident that your employees and your business are protected with solutions from McAfee.

McAfee® SaaS Email Archiving is designed to help businesses like yours safely store and easily access massive email volumes, and **McAfee® SaaS Email Encryption** was created to ensure that email information is delivered safely and securely.

Login, learn, and you could win!
Register today and you will be entered into a drawing to win a **Barnes & Noble Nook Color eReader!**
